

FOUR CORE COMPETENCIES will be conference focus

- Recognition of a terrorist event or other public health emergency.
- Meeting the acute care needs of patients, including pediatric patients and vulnerable populations, in a safe and appropriate manner.
- Rapidly and effectively alerting the public health system at the community, state, and national levels during a terrorist event.
- Participating in a coordinated, multidisciplinary response.

FOR A BROAD RANGE OF HEALTH & EMS PROFESSIONALS likely to be involved with terrorist-incident response

This one-day conference, followed by a series of discipline-specific training sessions offered during the next year, will address many of these issues for physicians, nurses (including physician assistants, advanced-practice nurses, and school nurses), public health officials, mental health professionals, EMS personnel, clinical laboratory personnel, pharmacists, physical therapists, respiratory therapists, and others who may be called on to respond to a terrorist incident.

- *Planning committee and presenters are strongly representative of health & EMS professionals**
Bruce W. Clements, MPH, Associate Director, Center for the Study of Bioterrorism and Emerging Infections, St. Louis University, St. Louis, Missouri (*planning committee*)
Thomas Clements, MD, MPH, Special Projects Medical Officer, Bioterrorism Program, Kansas Department of Health and Environment, Topeka, Kansas (retired) (*presenter*)
Michael J. “Micky” Davis, Director, Unified Government Office of Emergency Management, Kansas City, Kansas (*planning committee and presenter*)
Jerry Jaax, DVM, Associate Vice Provost for Research Compliance and University Veterinarian, Kansas State University, Manhattan, Kansas (*planning committee and presenter*)
Gerold Minns, MD, Professor, Internal Medicine, Associate Dean for Academic and Student Affairs, KU School of Medicine, Wichita, Kansas (*presenter*)
Shirley Orr, MHS, ARNP, CNAA, Director, Local Health, Office of Local and Rural Health, Kansas Department of Health and Environment, Topeka, Kansas (*planning committee*)
Gianfranco Pezzino, MD, MPH, Medical Director, Bureau of Epidemiology and Disease Prevention, Kansas Department of Health and Environment, Topeka, Kansas (*planning committee and presenter*)
Gloria Vermie, RN, MPH, MMRS Coordinator, Health Surveillance and Disease Prevention, Sedgwick County Health Department, Wichita, Kansas (*planning committee and presenter*)
Wallace N. Weber, MD, Heartland Dermatology Center PA, Hays, Kansas, Formerly of Fitzsimmons Army Medical Center, Denver, Colorado (*planning committee and presenter*)
Barbara L. Woods, RPh, MA, Clinical Assistant Professor, Director of Clinical Pharmacy Education, School of Pharmacy, University of Kansas, Lawrence, Kansas (*planning committee*)

- *From the University of Kansas Medical Center, Kansas City, Kansas*
Ilene Brawner, RN, MS, Director, Continuing Nursing Education (*planning committee*)
Sandra Colyer, MPA, Executive Officer, Office of the Executive Vice Chancellor (*planning committee*)
David Cook, PhD, Director, Department of Health and Technology Outreach (*planning committee*)
Dale Grube, MA, Associate Dean, University of Kansas Continuing Education, Director of Continuing Medical Education (*planning committee*)
Daniel Hinthorn, MD, FACP, Professor of Medicine, Director, Division of Infectious Disease (*planning committee and presenter*)
Patricia Hargrave, PhD, Assistant Professor, Clinical Laboratory Science (*presenter*)
Rebecca Horvat, PhD, Associate Professor in Pathology and Lab Medicine, Director, Microbiology Laboratory, University of Kansas Hospital (*planning committee and presenter*)
David F. Preston, MD, Professor Emeritus, Nuclear Medicine (*presenter*)
Ruth Schukman-Dakotas, Director of Safety (*planning committee*)
Nina Shik, RN, MSN, CIC, Infection Control Coordinator (*planning committee*)

**Presenters may vary by conference location.*

Acknowledgment
 This conference is supported by a grant from the federal Department of Health and Human Services, Health Resources and Services Administration, Bureau of Health Professions.

Can It Happen In Kansas?
RESPONSE TO TERRORISM & EMERGING INFECTIONS
 for Health Professionals and Emergency Medical Personnel

STATEWIDE ASSESSMENT REVEALS training needs of physicians, nurses, and EMS professionals

In a collaborative effort, the Kansas Department of Health and Environment and the University of Kansas Medical Center conducted a statewide assessment to identify the training needed by physicians, nurses, and EMS personnel to respond effectively to a terrorist incident. The purpose of the study was to pinpoint training needs so responsive training programs could be developed.

The messages from all three groups were consistent:

- A need for standardized training in recognizing presenting symptoms, making a differential diagnosis, protecting self and others, responding, and reporting.
- A need for standardized protocols and systems.
- A desire for basic terrorism response materials in concise, readily accessible formats such as pocket cards and flip charts.
- Frustration that, although many response plans are in place, those who must execute them don't know what is in the plan, don't know where the plan is, or have not participated in drills.
- Concern about apathy and lack of support from institutions and administrators.
- Concern about emerging infectious diseases.
- The need for responders and response agencies to understand one another's roles and responsibilities.

THIS CONFERENCE WILL FULFILL THOSE NEEDS

After attending this conference, participants will be able to:

- Be conversant with the Kansas Bioterrorism Plan, including protocols and emergency notification.
- Access response resources, including the Public Health Clinical Resource Network and the Public Health Information Exchange (PHIX).
- Be alert to presenting symptoms potentially associated with an emerging infection.
- Be alert to the potential for bioterrorist attacks to Kansas' agriculture infrastructure and the effects of an attack on humans and animals.
- Describe the roles and responsibilities of individuals and agencies involved in incident response.
- Identify diagnostic criteria for CDC's category "A" bioterrorist pathogens.
- Discuss components of CDC's Laboratory Response to Bioterrorism Plan.
- Recognize symptoms in patients exposed to significant levels of radiation and respond appropriately.
- Describe appropriate medical management of exposure to chemicals commonly seen or weaponized.

CREDIT WILL BE PROVIDED

All participants desiring credit are required to sign attendance rosters at the beginning of the conference. Credit will be prorated according to documented attendance.

Physicians: KU Medical Center Continuing Education is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing education for physicians. This conference is designated for a maximum of 7 hours in category 1 credit toward the American Medical Association Physician's Recognition Award. Physicians should claim only the hours that they actually spend in this activity.
Nurses (KU Medical Center, Kansas City, Kansas): This educational activity for 8.4 contact hours is provided by the University of Kansas School of Nursing, Continuing Nursing Education, which is accredited as a provider of continuing education in nursing by the American Nurses Credentialing Center's Commission on Accreditation.
Nurses (AHECs): The University of Kansas Area Health Education Centers—Northwest Region (KSBN Provider Number LT0086-1149), Rural Eastern Kansas (KSBN Number LT0056-0749), and Southwest Kansas (Provider Number LT0198-0794), as approved providers of continuing education by the Kansas State Board of Nursing, present this offering for 8.4 contact hours of credit applicable for relicensure of RNs and LPNs.
Pharmacists: The University of Kansas School of Pharmacy is approved by the American Council on Pharmaceutical Education as a provider of continuing pharmaceutical education. To receive a statement of continuing education credit for participating in the program, you must sign the attendance roster and complete the program evaluation. A statement of completion will be mailed to you within four weeks following your participation. This program has been approved for 7 hours (0.7 CEU). Program # 021-999-03-001-L04.
Laboratory professionals: The Southwestern Association for Clinical Microbiology has been approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program. Application has been made to SWACM to provide P.A.C.E. credits for attendance at this program.

TOPICS & SCHEDULE

7:15 **Registration and Continental Breakfast**

7:45 **Welcome and Introductions**

8:00 **Bioterrorism Preparedness in Kansas**

Gianfranco Pezzino, MD, MPH

- Key elements of the Kansas Bioterrorism Plan
- Major determinants of preparedness: early recognition and containment, emergency management vs. public health roles, national pharmaceutical stockpile
- Protocols and reporting
- Resources: Public Health Information Exchange and Public Health Clinical Resource Network
- Emerging infections in Kansas—the public health perspective: SARS, West Nile virus, deer-wasting disease, monkey virus

9:00 **Bioterrorism Implications for Kansas' Agriculture and Health Infrastructures**

Jerry Jaax, DVM

- Overview of the bioterrorist threat
- Potential for bioterrorist attacks on Kansas' agriculture infrastructure: concurrent effects on human and animal health
- Characteristics of biological agents: how they are produced and used and problems they present to responders and planners
- Weaponization: limited R&D or delivery system
- Catastrophic implications to the agricultural economy
- Implications for health professionals

10:00 **Break and Information Tables**

10:30 **Biologic Warfare, Terrorism, and Emerging Infections: The Clinical Perspective**

Daniel Hinthorn, MD, FACP, will present in Overland Park and Pittsburg.

Gerold Minns, MD, will present in Wichita.

Wallace Weber, MD, will present in Topeka, Garden City, and Hays.

- Motivation for terrorism
- Agents likely to be used
- Index of suspicion and clues to consider
- Who is responsible
- Special considerations for vulnerable populations, including pediatric and geriatric patients
- On the alert for emerging infections—SARS, West Nile virus, deer-wasting disease, monkey virus

12:00 **Lunch** (provided)

1:00 **Response to Bioterrorism: The Role of the Clinical Laboratory**

Rebecca Horvat, PhD, will present in Overland Park and other locations.

Patricia Hargrave, PhD, will present in several locations.

- Tests to be performed by a hospital microbiology lab, when to rule out, when to refer
- Types of specimens to divert from the hospital lab
- When to alert the state health department and CDC of a potential bioterrorism agent
- Select agent laws and shipping requirements
- Review of safety guidelines for handling, storing, and destruction of biohazard agents

1:45 **Medical Management of Chemical Casualties**

Thomas Clements, MD, MPH

- Categories of chemical agents likely to be weaponized: nerve, pulmonary, and incapacitating agents
- Initial life-saving care for chemical casualties: medical management in the prehospital or emergency department setting

2:30 **Break**

3:00 **Basic Preparedness for Radiological Disasters**

David F. Preston, MD

- Basics of radiation, syndromes, types of disasters
- Recognizing and treating patients with radiation exposure
- Control of the treatment facility and triage
- Counseling of exposed but noninjured patients
- Contacts in event of radiological disaster

4:00 **The Role of Emergency Response in a Terrorist Incident**

Micky Davis will present in Kansas City and other sites.

Gloria Vermie, RN, MPH, will present in Wichita and other sites.

- Roles and responsibilities of EMS, fire, and law enforcement
- Common elements of response plans
- Assessing a county's strengths, weaknesses, opportunities, and threats
- Coordinated response: public safety, public health, and health services
- Locale-specific current planning efforts

5:00 **Adjournment**

RESPONSE TO TERRORISM AND EMERGING INFECTIONS
